

Dan Njuguna Development Environment Set-Up

1. I run **Ubuntu 22.04.6 LTS** as my primary and only development OS. Installing Ubuntu had a few challenges especially with manual partitioning of the EFI and Swap area memory spaces, but I was able to install it whatsoever.
2. **VSCode** is the text editor of preference I have installed on my PC. No challenge whatsoever in installation.
3. **Git** installed for Version control.
4. **Ubuntu 22.04.6 LTS** has **Python 3.10.12** already installed on full installation of the OS.
5. I installed **pip3** and **python3-devtools**.
6. Configured **MySQL Workbench** for Linux.

```
dan@dan: ~/Coding/happy_people
dan@dan: ~/Coding/happy_people$ git --version
git version 2.45.2
dan@dan: ~/Coding/happy_people$ python3 --version
Python 3.10.12
dan@dan: ~/Coding/happy_people$ dart --version
Dart SDK version: 3.4.3 (stable) (Tue Jun 4 19:51:39 2024 +0000) on "linux_x64"
dan@dan: ~/Coding/happy_people$
```
